

DYNASAFE ANNOUNCES THE LAUNCH OF ITS DYNASEALR P6M EXPLOSIVE CONTAINMENT CHAMBER

Karlskoga, Sweden- June 14, 2018- Dynasafe announces the launch and availability of the DynaSEALR P6M.

“The transportability of the DynaSEALR P6M permits the EOD technician to be closer to the bomb location when loading an improvised explosive device into the chamber, therefore minimizing the risk of damage to buildings and loss of human life,” said Holger Weigel, CSO at Dynasafe.

DynaSEALR P6M

DynaSEALR P6M provides highly effective protection at minimal weight and at an affordable price. The chamber fully contains the pressures and fragments released by an explosive. The chamber is rated for an NEW of 1 kg, and is gas-tight in the event that an improvised explosive device (IED) contains chemical or biological agents.

Transportability, ease of ingress and egress, and X-ray transparency make the DynaSEALR P6M a desirable alternative to larger containment chambers. The latter are quite heavy, extremely difficult to transport and cannot be operated indoors.

The DynaSEALR P6M not only allows bomb squads to ingress and egress buildings quickly, but it can also be utilized at a security checkpoint and screening location. Their utilization will minimize the risk of harm to property and human life.

Technical Data

DynaSEALR P6M	
<u>Containment Capability</u>	
NEW	1 kg / 2.2 lbs.
Repeated detonations	1 gas-tight
<u>Suspect Package Metrics</u>	
Package diameter Ø	17 cm / 6.69"
Package height	63 cm / 24.8"
Package weight	10 kg / 22 lbs.
<u>Chamber Metrics</u>	
Diameter Ø	54 cm / 21.26"
Height	65.5 cm / 27.79"
Weight	300 kg / 661.3 lbs.

Mobility Options

- The DynaSEALR P6M has a customized electrified drive unit the **Transporter DU-P6M**. The drive unit is a battery powered “dolly” designed to transport the chamber close to the potential bombsite.
- The DynaSEALR P6M can be mounted on a variety of vehicles, such as a manual dolly, pick-up truck or an ATV.
- The DynaSEALR P6M can be mounted on a trailer with a “DynaSEALR X 10 light” improving mission safety.
